PROBLEM DESCRIPTION

Update the MILITARY HANDBOOK to reflect the addition of the Military Standard-Computer Fusion Metafile for the National Imagery Transmission Format Standard.

RECOMMENDED WORDING

See attached.

RATIONALE

The Joint Exploitation Module (JEM) requires the use of the Computer Fusion Metafile (CFM) as the interoperable exchange mechanism for multi-INT data, graphics and fusion results. The addition of the CFM standard is required to fuse multi-INT data with imagery, maps and symbology.
